

COOL CUTTINGS.

Available immediately, Blissenbach mechanical tube inside scarfers equipped with cutting ring cooling. Tools featuring the cutting ring cooling are now available even for 15 mm tube inside diameters.

This Blissenbach system offers advantages:

- Additional cutting ring life increase
- Reduction in machine downtime
- Minimal rejects

Cutting ring cooling is an extra plus when it comes to aluminium-coated pipe: this feature prevents material buildup around the cutting ring during deburring.
