

THE WORLD'S SMALLEST HYDRAULIC ID SCARFERS – FOR DIAMETER OF 16 - 22 MM.

The smallest member of the hydraulic ID scarfers of Ernst Blissenbach GmbH presents itself smaller than ever. With its length of 174 mm, our mini deburrer covers an internal tube diameter range of 16 - 22 mm. Our product range is thus expanded to include smaller diameters. Possible areas of application are small and thick walled tubes or cylinder tubes as well as the use with high strength materials.

H 016 022 – 10.000

- Continuous fine adjustment of the cutting ring height from outside through the open seam tube
- Cutting ring cooling, Roller cooling
- Lateral wear protection made of carbide metal in the area of the copy rollers
- Operating range adjustable by replaceable lifting carriage system
- No external hydraulic or coolant lines – everything enclosed within the scarfer body – thus preventing mechanical damage
